Programa Condensado y Calendario del Curso

ACTIVITIES FOR STUDENT

Evidence 1: Essay on the relationship between urban development policy of a city with high industrial activity and the basic principles of nature. Electronic file of at least 5 pages. 10 minutes of oral presentation with questions and answers with visual support of 10 slides tops. Addresses a current problem of urban development at the local or national level. Relates the basic principles of nature. Identifies violations of the basic principles of nature. Includes reliable literature.

Evidence 2: Essay where test points relate of this phase around a problem of environmental pollution and its effects on global warming and the loss of biodiversity. Electronic file of at least 5 pages. 10 minutes of oral presentation with questions and answers with visual support of 10 slides tops. Addresses a current problem of urban development at the local or national level. Relates the basic principles of nature. Identifies violations of the basic principles of nature. Includes reliable literature.

Evidence 3: Conceptual Map on a case study that is related to the information in this phase with current environmental health problems. Electronic file of at least 5 pages. 10 minutes of oral presentation with questions and answers with visual support of 10 slides tops. Addresses a current problem of urban development at the local or national level. Relates the basic principles of nature. Identifies violations of the basic principles of nature. Includes reliable literature.

Evidence 4: Essay on the analysis of environmental indicators in a city of México, according to the criteria, aims and objectives of the various international meetings on the environment and sustainability, considering the available natural resources, air quality, water and soil and waste generated by the city chosen. Electronic file of at least 5 pages. 10 minutes of oral presentation with questions and answers with visual support of 10 slides tops. Addresses a current problem of urban development at the local or national level. Relates the basic principles of nature. Identifies violations of the basic principles of nature. Includes reliable literature. Includes statistical information of the rhythm of population growth. Relate the demographic development to the economic situation of the city. Includes reliable bibliography.

Evidence 5: Participation in a role play game about environmental policy in Mexico, analyzing the participation of the Mexican government in an international convention or agreement, identifying the actions undertaken and advances made. In the game 3-5 students participate with different roles and a current problem is addressed at the international level where the Mexican government has a stake. Electronic file of at least 5 pages with the conclusions of each participant in the activity. The file contains current references and there are from reliable sources. Oral presentation of 5 minutes each participant defending the position that represents the role.

Integrator product: presentation and defense of an essay where critical analysis and develop solutions to a specific environmental problem are proposed, in accordance with sustainable development.
